Anas Semesmieh

Engineering Manager | Tech Manager | Development Lead |
Solutions Architect | Platform Engineering Enthusiast
Greater Sydney Area

Summary

As an Engineering Manager at Pickles Auctions, I lead the Platform Engineering Team and support the development teams in delivering cost-optimized, scalable, and resilient automation and DevSecOps solutions in Azure Cloud. I have over a decade of professional experience in various industries, with a recent focus on the automotive industry's innovations through technology.

My core competencies include full stack cloud-native development, software architecture, DevOps processes and tools, and agile methodologies. I am passionate about building and automating solutions that streamline processes, improve efficiencies, and enhance customer satisfaction. I also provide influence and thought leadership to the development center of excellence and champion the adoption and culture change required for the continuous improvement of the DevOps capability across all development teams.

Experience

Pickles Auctions

6 years 8 months

Engineering Manager - Platform Engineering

May 2021 - Present (4 years 4 months)

Sydney, New South Wales, Australia

Platform Engineering Leadership: Leading and mentoring high-performing engineering teams to build and scale core platform services.

DevSecOps Solutions: Designing and implementing cost-optimized, scalable, and resilient automation and DevSecOps solutions in Azure Cloud.

Strategic Influence: Providing thought leadership and influencing technical roadmaps by identifying new industry trends and technologies.

Culture & Advocacy: Championing DevOps culture change, driving continuous improvement, and acting as a developer advocate to ensure seamless platform service adoption.

Stakeholder Collaboration: Partnering with technical and non-technical stakeholders to own and build complex platform products and services, significantly impacting their strategy.

Development Lead (CarZapp)
January 2019 - May 2021 (2 years 5 months)
Malaysia

CarZapp
Development Lead
January 2019 - Present (6 years 8 months)
Kuala Lumpur, Malaysia

Software Development: Building .NET Core microservices and responsive frontend web apps with Angular/TypeScript.

Cloud & DevOps: Developing cloud-native, serverless solutions on Azure and implementing DevOps and CI/CD pipelines with Azure DevOps.

Agile Practices: Applying Agile (Scrum) and source control best practices, including daily scrum meetings and pair programming.

Collaboration: Coordinating with development teams, reviewing coding standards, and working closely with product stakeholders on feature enhancements and strategic planning.

Cross-Platform Experience: Managing mobile app stores (App Store & Play Store) and working on various platforms, technologies, and hybrid cloud solutions.

Nexotech Malaysia (Smana Trading SDN BHD)
Technical Consultant
September 2019 - May 2022 (2 years 9 months)
Kuala Lumpur, Federal Territory of Kuala Lumpur, Malaysia

Strateq Group Of Companies

1 year 8 months

Solutions Architect

February 2018 - December 2018 (11 months)

Kuala Lumpur, Malaysia

As a DevOps Team Lead, I drive the adoption of CI/CD principles and the latest trends to maximize the productivity and availability of enterprise solutions. I have a strong background in maintaining and supporting a portfolio of enterprise products, expertly managing change requests, and leading migrations to modern technology stacks.

My skills also include:

IoT Solutions: Designing and implementing end-to-end IoT solutions, both on-premises and on the cloud.

AI/ML Integration: Developing and deploying real-time video analytics integrated with existing CCTV infrastructure, leveraging AI and machine learning for intelligent edge processing.

Senior Software Engineer

May 2017 - February 2018 (10 months)

Kuala Lumpur, Malaysia

Big Data Integration: Partnering with Big Data teams to design and implement integration points for enterprise solutions.

IoT Solution Design: Creating and deploying full-stack IoT solutions, from hardware to cloud and mobile applications.

Legacy System Modernization: Extending and migrating legacy web applications to modern API/service-based architectures.

Sitecore Malaysia

Solutions Engineer

January 2017 - April 2017 (4 months)

Kuala Lumpur, Malaysia

Best Practices Guidance: Assisting clients with their implementations by providing expert guidance on best practices.

Complex Troubleshooting: Identifying and resolving complex performance and functional issues within existing implementations.

Requirements Mapping: Translating customer requirements into practical implementation strategies that adhere to industry best practices.

Reverse Engineering: Skilled in reverse engineering complex customizations to understand their root cause and provide effective solutions.

SelfDrvn Enterprise
